

	Gadget	How to make it
Day 1	Mirror that gives you stuff	Made of shiny card with slits radiating from the centre that allow you to push objects through.
Day 2	Invisibility Umbrella	Golfing umbrella with a large sheet (or something) stapled/sewn to the edge. When closed it looks like a normal umbrella. When opened above your head, the sheet falls down in front of the person holding it, perhaps down to their waist, so their top half can't be seen.
Day 3	Diversion device	Pot of child's bubble mixture
Day 4	Voice changer	A long sharp object (a nail), a feather or a whoopee cushion, marshmallows
Day 5 (Sunday)	Mind reading camera	A naff looking home-made camera made from a cardboard box with buttons stuck on made from bottle tops and a lens made out of a circular piece of tin foil.
